

Customer Reassurance

The Stability of TCL SunPower International

There has been a lot of news recently about “SunPower” going bankrupt, and it has understandably caused confusion for homeowners and businesses looking to invest in high-quality solar panels. This document clarifies exactly what happened and why customers can remain fully confident when purchasing SunPower solar panels through TCL SunPower International.

1. The SunPower That Went Bankrupt Is ***Not*** the One Making Your Panels

The company that filed for bankruptcy in 2024 was **SunPower Corporation**, a U.S.-based solar installation and services company. It was **not** the global solar manufacturing business associated with today’s SunPower-branded solar panels. Your SunPower panels come from **TCL SunPower International**, a completely separate and financially stable entity.

2. TCL SunPower International Is a Strong, Global, Stable Company

TCL SunPower International is backed by **TCL Group**, a major global technology conglomerate with strong financial foundations. The manufacturing heritage of SunPower panels originates from **Maxeon Solar Technologies**, known worldwide for producing some of the most durable, efficient solar modules ever made. Maxeon remains operational, and TCL SunPower continues that legacy under a new structure designed for long-term global growth.

3. A Warranty You Can Trust

Your SunPower system comes with a **30-year product and performance warranty** - one of the strongest in the industry. This warranty is backed by:

- TCL’s global financial strength
 - SunPower/Maxeon’s long-standing track record in premium solar technology
 - A corporate commitment to quality, sustainability, and long-term market presence
- This combination makes the warranty highly credible and secure for decades to come.

4. Industry Momentum and Long-Term Commitment

TCL SunPower International has demonstrated ongoing investment and growth, including:

- Launching new high-performance product lines for 2025
 - Joining global sustainability initiatives
 - Maintaining solar manufacturing excellence rooted in SunPower/Maxeon technology
- These are strong signals of a company planning for the next 40+ years - not stepping away from the market.

Conclusion

When buying **SunPower solar panels through TCL SunPower International**, you are investing in:

- A stable, globally backed solar manufacturer
 - Industry-leading panels
 - A trustworthy 30-year warranty
 - A long-term partner committed to innovation and customer support
- Your system, your investment, and your warranty are all in safe hands.
